**Systems & Software Partners With Triton Water Technologies
At The City of Shreveport**

Williston, VT, December 30, 2010 – Harris Computer Systems (Harris), a subsidiary of Constellation Software Inc. (TSX: CSU) is pleased to announce that the City of Shreveport (Department of Operational Services – Water and Sewerage), Louisiana (The City) has selected Systems & Software (S&S), a wholly-owned subsidiary of Harris, to implement its enQuesta 4 solution under a newly-formed partnership with Triton Water Technologies (Triton).

The City of Shreveport hired Triton Water Technologies as a consultant for a two-phased project to implement both a new AMR (Automated Meter Reading) solution and a new CIS (Customer Information System). Triton's goal was to select a CIS vendor that could deliver the desired solution and offer a comprehensive maintenance and support package. Systems & Software was selected as the vendor of choice to implement enQuesta 4 which includes a state-of-the-art CIS, enQuesta VoiceConnect (IVR), enQuesta Mobile, and enQuesta WebConnect/PayConnect (Customer Self-Service) in a fast-tracked 12 month implementation.

The City of Shreveport services a population of 200,000+ and is classified as the third largest film capital following California and New York. With this implementation, the City wants to upgrade their legacy system to a vendor-supported, modern CIS that will automate many of their internal and external offerings.

Raja Mukherjee, S&S' new General Manager commented, "These are the types of projects we want to pursue going forward. We have received numerous accolades regarding enQuesta 4 to date and the market enthusiasm continues to keep our organization motivated to deliver."

The City of Shreveport is expected to go live in Q4, 2011. S&S is confident it can provide the same 'success story' for this entity as it has for its other long standing partners.

About Systems & Software, Inc.

Since 1973, Systems & Software has been a top-rated CIS provider to municipal and investor-owned (IOU) water, electric and gas utilities. With an unrivalled track record of success, the company's web-based enQuesta software drives advanced business performance including utility billing, revenue management, mobile workforce management, GIS integration, electronic bill presentment & payment (EBPP), automated meter integration (AMI/MDM), time-of-use (TOU) billing, asset management/work management integration, customer self-service web portal, business intelligence and reporting. Based on service-oriented architecture (SOA), enQuesta is specifically designed for utilities and is proven to increase efficiencies and revenues, as well as enhance customer service. For more information about Systems & Software, and enQuesta, please visit www.ssivt.com.

About Harris
